Member of the International Center of Reiki Training Association

Reiki is an ancient natural healing technique involving the placement of hands onto or above the body (client is fully clothed). It is a form of stress reduction and relaxation that promotes healing and balances the mind, body, and spirit. It is simple, natural, and relaxing.

Reiki's meaning is derived from two Japanese words Reik and ki and when put together to describe healing, it means universally guided life force energy or life energy that is guided by God
